Clery Reporting

Empower your campus safety compliance.

CivicRMS enhances campus law enforcement agencies' ability to comply with Clery reporting requirements by enabling school-based police departments to collect reliable data on campus crimes and incidents—essential for compiling accurate Clery reports. These reports are not only a legal requirement but also serve as a key resource for students, faculty, and staff to understand the safety landscape of their campus.

With CivicRMS, police departments can efficiently share critical safety information with all campus stakeholders, ensuring that everyone is informed and can take appropriate precautions. In this way, the use of dependable data for decision-making strengthens campus security measures and initiatives, ultimately maintaining the institution's reputation as a secure environment for education and work.

Core Benefits

Clery Act Policy Compliance

Collect, classify, and disclose information about crime on and near campuses that support the institution's security policies and procedures
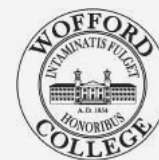

Grant Support

Achieve policy goals with compliant reporting metrics to obtain grant funding for training, equipment, technology, and community outreach programs

Campus Security Planning

Develop strategies for responding to emergencies and preventing crime with data intelligence to make informed decisions

From the Campus of

"I save a fair amount of time utilizing CivicRMS. There are so many things this system is capable of; the Client Success team does a great job training on the best way to use the system."

Corporal Kris Atkins
Wofford College Campus Safety
South Carolina
