

Tactical Tools in Your RMS

Mapping locations for emergency response.

Proper preparation saves lives. Through CivicRMS's Location Master Index, law enforcement officials can prepare tactical operations plans for specific locations for crisis management, such as for school buildings, college campuses, and more. Future planning can help prevent operational paralysis and keep your community and officers safer.

Core Benefits

Document Emergency Response Plans

Identify potential threats and hazards in advance and equip LEOs with situational awareness.

Access Vital, Real-Time Updates

Role-based portals allow prosecutors and law enforcement to easily share information across agencies.

Protect Your Community

Improve response times and keep officers safer with access to critical information during emergent situations.

Key Functionalities

- Designate trauma/casualty triage areas
- Identify rotary medevac landing zones
- Document emergency action plan
- Create contingency plans for responding agencies
- Include GoPro video footage of school layouts, and photos of exterior, entrances, doors, and windows
