Victim Services

Centralizing documentation and tracking to better support victims.

CivicCase for Prosecutors improves the way victim data integrates into the prosecutorial process. The system's comprehensive reporting capabilities allow for detailed analyses of crime types, victim demographics, and incident frequencies, facilitating streamlined state reporting and grant applications.

Beyond internal data collection, CivicCase for Prosecutors extends its functionality with the potential to integrate with neighboring law enforcement agencies' RMS software. This feature enables prosecutors to access a consolidated database of victim information from various sources, enhancing collaboration and data accuracy across jurisdictions—all in efforts to better support victims and improve community outcomes.

Core Benefits

Improve Victim Support

- Victims can set their preferred communication methods.
- CivicCase generates notifications/updates in accordance with these preferences.

Centralize Victim Details

- Integrate with LEA's records management system or enter data manually.
- Instantly access victim information within case folders and search indexes.

Manage State Reports & Grants

- Easily compile data points, such as crime types and victim demographics.
- Generate robust reports to secure necessary funding & promote transparency.

Link Victims to Cases/Defendants

- Create comprehensive views of cases by linking victims, defendants, and their respective cases.
- Streamline access points within your case management system.
